Installation

1. Uncompress the file that you downloaded. This will yield a directory (folder) called `HornMorpho-2.1`, which contains all of the files that you need to run HORNMORPHO.

2. Go to the `HornMorpho-2.1` directory (folder), and enter the following, making sure that you are running Python 3.0 or 3.1.

    ```
    python setup.py install
    ```

Use

STARTING THE PROGRAM

Start up the Python interpreter, again making sure that you are running at least Python 3.0, and type the following to load the program.

```
import l3
```
